HEPATITIS Be VIRUS ANTIGEN

Hepatitis Be Antigen	Not detected	Not detected
----------------------	--------------	--------------

For the most analytically sensitive (down to less than 0.01 pg/mL), specific and quantitative assay for hepatitis B virus, HBV DNA UltraQuant (test code #8137) is recommended, if clinically indicated. Changes in HBV viral load by HBV DNA UltraQuant are useful for the diagnosis and monitoring patient's response to antiviral therapy.

Hepatitis Be Antigen Not detected Not detected

For the most analytically sensitive (down to less than 0.01 pg/mL), specific and quantitative assay for hepatitis B virus, HBV DNA UltraQuant (test code #B137) is recommended, if clinically indicated. Changes in HBV viral load by HBV DNA UltraQuant are useful for the diagnosis and monitoring patient's response to antiviral therapy.

HEPATITIS B VIRUS DNA ULTRAQUANT

Hepatitis B DNA UltraQuant 661.00 * pg/mL (< 0.01)

1 pg = approximately 150,000 copies

REPORT COMPLETED PLEASE FILE

Tests Requested:

HEPATITIS B VIRUS DNA ULTR

HEPATITIS B VIRUS DNA ULTRAQUANT, PCR: Hepatitis B Virus (HBV) DNA UltraQuant detects and quantitates HBV viral concentrations at the chronic or acute stage of viremia. Patients with low HBV concentrations (less than 100 pg/mL) respond to treatment with interferon significantly better than patients with circulating HBV DNA concentrations in excess of 200 pg/mL. The sensitivity of HBV DNA UltraQuant makes this test suitable for monitoring response to therapy. Note that 150,000 copies of viral DNA is equivalent to 1 picogram.

HEPATITIS Be VIRUS AG

Hepatitis Be Virus Antigen	Positive	Not detected
----------------------------	----------	--------------

 For the most analytically sensitive (down to less than 0.01 pg/mL), specific and quantitative assay for hepatitis B virus, HBV DNA UltraQuant (test code #8137) is recommended, if clinically indicated. Changes in HBV viral load by HBV DNA UltraQuant are useful for the diagnosis and monitoring patient's response to antiviral therapy.

DATE OF EXAM: 03/27/2004

ABDOMINAL ULTRASOUND:

Clinical History: Chronic hepatitis B.

Multiple longitudinal and cross-sectional transabdominal real-time images were obtained.

The liver is normal in size (measuring 13.1 cm) and position, demonstrating normal uniform echogenicity with no evidence of mass, cystic or solid. There is no evidence of intrahepatic biliary or portal dilatation. The gallbladder is normal in size and contour with no evidence of thickening of the wall or echoes within the lumen. The common bile duct is normal in size, measuring approximately 5.0 mm.

The visualized spleen (measuring 10.4 cm) is unremarkable. The pancreas is not visualized due to body habitus. The visualized portions of the aorta are normal in course and caliber.

The right kidney measures 11.4 cm x 4.2 cm x 5.8 cm. The left kidney measures 11.6 cm x 5.1 cm x 5.6 cm. The kidneys are normal in contour and echogenicity with no evidence of mass; calculus or hydronephrosis. The renal cortices are of normal thickness and the corticomedullary junctions are well delineated.

IMPRESSION:

1. VISUALIZED STRUCTURES ARE UNREMARKABLE.
2. NONVISUALIZATION OF PANCREAS.

Thank you for your referral.

REFERRING PHYSICIAN: SAM KAM, M.D.

ABDOMINAL ULTRASOUND:

DATE: 10/02/98

Multiple real-time images of the abdomen were obtained.

The liver is normal in size and position demonstrating normal, uniform echogenicity without focal cyst or solid mass. There is no evidence of intrahepatic biliary or portal dilatation. The gallbladder is normal without evidence of calculi or wall thickening. There is no pericholecystic fluid collection. The common bile duct is of normal diameter measuring 4.5 mm.

The visualized pancreas and spleen are both normal. The visualized portions of the aorta are normal in course and caliber.

The right kidney measures 10.5 cm x 5.2 cm x 4.7 cm. The left kidney measures 11.7 cm x 5.0 cm x 5.0 cm. There is no evidence of hydronephrosis or mass. The renal cortices are of normal thickness and the corticomedullary junctions are well-delineated.

IMPRESSION: NORMAL ABDOMINAL ULTRASOUND.
